DELIVERY OF STATIONARY CAMERA SYSTEMS AND PROVISION OF RELATED SERVICES

Above-the-threshold public delivery contract,
open procedure (hereinafter the “Public Contract”)

Reference number: VZ_2020_A46

ID	Question	Answer
1	<p>Tender documentation, Annex No. 1, paragraph 2.3</p> <p>Based on the explanation issued on 04 May 2020 under number 10 in the third part of the contracting authority's answers to the tenderers' questions, the requirement to encode the "vehicle type" and "vehicle registration number" metadata items has been changed to the now required UTF-32 encoding. We ask the contracting authority to state whether the contracting authority also allows the use of commonly used UTF 8 encoding, which allows to achieve the same purpose, ie the insertion of a delimiter, and the result is a more compact result string, and complete the relevant specification.</p>	<p>Yes.</p> <p>The contracting authority allows UTF-8 (or UTF-16), where the difference is the number of bytes in memory that are needed to allocate the character. As the participant rightly points out, it is about achieving the same purpose.</p>
